CUT HANDLE LETTERS OF SUPERIOR MAKE

Price List of Mechanical Quoins

Above 26in. are this Design, to work with 4 Pinions.

This Locking-up Apparatus dispenses with wooden side and foot sticks, mallet and shooter, and wooden quoins. As a means of locking-up formes it is so powerful, that it may be accomplished without any greater effort than that required for opening or shutting a good lock; yet it acts with perfect regularity, and nothing can be more simple or secure.

By the employment of this Locking-up Apparatus, a forme may be kept standing for any length of time, as it is not affected either by dryness or humidity like the wooden quoin. Once tightened, it cannot, by any possibility, become loosened of itself.

This useful invention is composed of a quoins or side and foot stick in tempered metal provided with teeth; and the apparatus completed by a cog with corresponding teeth, which is turned by a key.
